

SIGNATURE METHODOLOGY

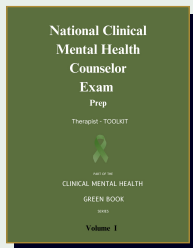

The Clinical Mental Health Green Book, LLC™

PASS THE NCMHCE. • THINK CLINICALLY. • ANSWER CONFIDENTLY.

The Edge Mapping Method™

& the 9 Differentiating Vignettes

Two interlocking systems sit at the heart of the Green Book™. One trains how to think diagnostically. The other proves you can apply that thinking under real exam pressure.

VOL. I

FROM THE TOOLKIT

The Edge Mapping Method™

A structured visual reasoning framework that teaches clinicians to think along the diagnostic edges — the narrow zones where disorders overlap, mimic, or co-occur. Map the boundary conditions that separate look-alike presentations.

WHAT IT DELIVERS

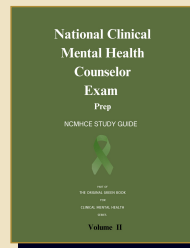

- 5-zone diagnostic grid
- T.F.S.R. course & onset reasoning
- R.O.S.E. function testing
- SIGECAPS • DIGFAST shortcuts
- Green Book Thesaurus integration

5

DIAGNOSTIC ZONES

Mapped per presentation

HOW to think

VOL. II

FROM THE STUDY GUIDE

9 Differentiating Vignettes

A 300-question preparation system mirroring the structure, pacing, and clinical reasoning demands of the actual NCMHCE. Every item carries a detailed rationale tied to DSM-5-TR and Green Book methodology.

WHAT IT DELIVERS

- Part I — 210 MCQs (30 per section)
- Part II — 90 vignette questions
- 10 questions for each of 9 vignettes
- Diagnostic differentiation focus
- Multicultural & ethical scenarios

300

PRACTICE QUESTIONS

210 MCQs + 90 vignette items

PROOF you can apply it

EDGE MAPPING™ TEACHES THE METHOD.
THE 9 VIGNETTES PROVE THE MASTERY.

Together, they form the diagnostic backbone of the Green Book™.
